

How to extract Postgres tables to csv files

Posted On Jun 18, Posted by [SSTS](#) Category [Blog](#)

The Postgres COPY command can be run within psql to extract csv files for exchange to an external system. You supply

a file location, delimiter, and format.

Here's an example:

```
COPY products_273 TO '/tmp/products_199.csv' DELIMITER ',' CSV HEADER;
```
